Authorized to Work for Any U.S. Employer

Education

Georgia Institute of Technology Jan 2026 – Dec 2027
M.S. in Computer Science
- Coursework: Bayesian Methods, Artificial Intelligence, Database System, Network Analysis, Video Game Design

Columbia University Sep 2021 – Feb 2023
M.S. in Data Analytics *GPA: 3.89*
- Coursework: Advanced Data Analysis, Anomaly Detection, Data Management, Machine Learning

University of California, Berkeley Aug 2017 – Dec 2020
B.S. in Economics | Highest Distinction *GPA: 3.94*
- Coursework: Econometrics, Data Structures & Algorithms, Data Science, Statistics, Financial Economics

Professional Experience

Data Science Intern May 2026 – Sep 2026
Pacific Gas and Electric Company (PG&E)
- Developed probabilistic and graph-based models on time-series data with 200,000+ records.
- Applied process mining and network analytics to identify bottlenecks, dependencies, and key risk drivers across operational workflows.
- Leveraged AI-assisted development through prompt engineering, code review, and output validation using alternative methods to ensure analytical accuracy.
- Conducted diagnostic analytics and engineered custom metrics to explain data patterns, quantify process inefficiencies, and present findings to 30+ technical, business, and regulatory stakeholders.

Data Analyst Intern Jan 2026 – Apr 2026
Bank of Montreal (BMO)
- Defined infrastructure and operational KPIs through data analysis and benchmarking to support executive decision-making for the CIO and senior leadership.
- Built and validated datasets from multiple internal systems, enabling reliable analytics for 20+ stakeholders.
- Translated business requirements into analytical frameworks through stakeholder interviews and workshops.
- Leveraged AI to accelerate business-logic testing and debugging and convert stakeholder discussions into structured requirements and user stories.

Data Analyst Jan 2024 – Jul 2024
XPENG Motors
- Delivered data-driven solutions that increased autonomous driving model KPIs by 10% on average.
- Designed and optimized 100+ Python-based detection algorithms supporting large-scale data operations.
- Partnered with ML engineers to establish quality standards and resolved 25+ edge-case driving scenarios monthly to improve model robustness and data quality.

Skills

Technical: SQL, Python, PySpark, R, Java, JavaScript, Git, AWS, GCP, Snowflake, Power Apps, Power BI, Tableau, Machine Learning, Deep Learning, Statistical Modeling, Bayesian Networks, Probabilistic Graphical Models, Markov Models, Graph Analytics, Network Analysis, Process Mining, Risk Modeling, Time Series Analysis, Feature Engineering, ETL, Scikit-learn, Pandas, NumPy, NLP, Computer Vision, LLM Applications, Prompt Engineering

Business: Data Storytelling, Stakeholder Management, Executive Communication, Business Analysis, Process Improvement, Product Analysis, Data Quality, Agile, Jira, Cross-Functional Collaboration, Supply Chain Analytics, Operational Analytics, Risk Assessment

Certifications: Microsoft Power BI Data Analyst Associate, Google Data Analytics Professional Certificate, Microsoft Azure Fundamentals (AZ-900)
